

MARSHARINE A. SIMPSON

SOFTWARE DEVELOPER | REACT | TYPESCRIPT | JAVASCRIPT | POSTGRESQL

[Email](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software developer with a B.S. in Information Technology and Security and hands-on experience building, testing, and deploying authenticated web applications. Demonstrates React, TypeScript, JavaScript, Supabase, PostgreSQL, relational data, Row Level Security, automated testing, accessible UI, and production debugging. Brings additional experience in SaaS support, AI evaluation, technical troubleshooting, and documentation.

TECHNICAL SKILLS

Development: React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Python

Backend and Data: Supabase, PostgreSQL, authentication, Row Level Security, relational modeling, CRUD

Quality and Delivery: Vitest, React Testing Library, ESLint, TypeScript, GitHub Actions, Git, Vercel, accessibility

SELECTED SOFTWARE DEVELOPMENT PROJECTS

Student Progress Tracker | React | TypeScript | Supabase | PostgreSQL | [Live](#) · [GitHub](#) · [Case Study](#)

- Designed and deployed an authenticated application for managing students, skills, dated assessments, and current mastery through one teacher dashboard.
- Implemented password recovery, relational CRUD workflows, assessment-history preservation, Row Level Security, and tenant-aware database constraints that prevent cross-account references.
- Built 18 Vitest and React Testing Library tests and a GitHub Actions pipeline that runs linting, tests, and production builds on pull requests and main-branch updates.

Secure Service Operations Platform — In Development | TypeScript | NestJS | PostgreSQL | Docker | [GitHub](#)

- Defined product requirements, service boundaries, threat model, architecture decisions, delivery standards, and an issue-based roadmap for a multi-tenant service operations platform with human-approved AI assistance.

AI Development Field Guide | JavaScript | HTML5 | CSS3 | Accessibility | [Live](#) · [Case Study](#)

- Built and deployed a searchable technical reference with responsive navigation, keyboard interaction, persistent preferences, reading progress, and accessible content structure.

RELEVANT TECHNICAL EXPERIENCE

AI Data Annotator and Evaluator | RWS | Remote | Oct 2025 - Present

- Evaluate AI-generated and vision-based outputs for accuracy, relevance, instruction adherence, consistency, and edge cases using detailed quality standards.

SaaS Technical Support | HHAEExchange | Remote | Sep 2024 - Dec 2024

- Diagnosed software and provider issues, documented reproducible findings and support workflows, and collaborated across teams on recurring platform problems.

Online Contributor and AI Evaluator | TELUS | Remote | 2019 - 2023

- Applied structured evaluation guidelines to ambiguous digital and AI-related content, documented decisions, and identified inconsistent results.

Earlier technical support: CenturyLink, AT&T, Technosource, and Time Warner Cable / The Answer Group - networking, connectivity, configuration, documentation, and end-user troubleshooting.

EDUCATION

Bachelor of Science in Information Technology and Security | University of Phoenix | Cum Laude
