

MARSHARINE A. SIMPSON

SOFTWARE DEVELOPER | REACT | TYPESCRIPT | JAVASCRIPT | SUPABASE AND POSTGRESQL

marsharineasimpson@gmail.com | github.com/marsharine-cs | projectsportfolio-nine.vercel.app

PROFESSIONAL SUMMARY

Software developer with a B.S. in Information Technology and Security and experience building and deploying full-stack and frontend web applications. Develops with React, TypeScript, JavaScript, Supabase, and PostgreSQL, with hands-on work in authentication, relational data, Row Level Security, CRUD workflows, automated testing, accessibility, and production debugging. Brings professional experience in SaaS support, technical troubleshooting, AI evaluation, and clear technical documentation.

TECHNICAL SKILLS

Development: React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Python | **Backend and Data:** Supabase, PostgreSQL, authentication, Row Level Security, relational data, CRUD | **Quality and Delivery:** Vitest, React Testing Library, TypeScript checking, ESLint, Git, GitHub, Vercel, accessibility | **Technical:** SaaS support, networking, cybersecurity fundamentals, debugging, Jira, technical documentation

SELECTED SOFTWARE DEVELOPMENT PROJECTS

Student Progress Tracker

React | TypeScript | Supabase | PostgreSQL

- Designed and deployed an authenticated full-stack application for managing students, skills, dated assessments, and current mastery in one teacher dashboard.
- Implemented protected routes, password recovery, relational CRUD workflows, assessment-history preservation, and Row Level Security policies that isolate user data.
- Created 18 automated tests with Vitest and React Testing Library covering authentication, form behavior, database errors, assessment recording, and dashboard status logic; resolved a production Vite environment-configuration failure.

AI Development Field Guide

JavaScript | HTML5 | CSS3 | Accessibility

- Built and deployed a searchable technical reference that organizes AI fundamentals, evaluation, and responsible-use guidance into an accessible, responsive learning interface.

Luma One Product Experience

JavaScript | HTML5 | CSS3 | Responsive UI

- Built an interactive storefront with product customization, quantity controls, cart state, responsive navigation, keyboard access, and user-facing status feedback.

RELEVANT TECHNICAL EXPERIENCE

AI Data Annotator and Evaluator

RWS | Remote | Oct 2025 - Present

- Evaluate AI-generated and vision-based outputs for accuracy, relevance, instruction adherence, consistency, and edge cases using detailed quality standards.

SaaS Technical Support

HHaEXchange | Remote | Sep 2024 - Dec 2024

- Diagnosed software and provider issues, documented reproducible findings and support workflows, and collaborated across teams on recurring platform problems.

Online Contributor and AI Evaluator

TELUS | Remote | 2019 - 2023

- Applied structured evaluation guidelines to ambiguous digital and AI-related content, documenting quality decisions and identifying inconsistent results.

Earlier technical support: CenturyLink, AT&T, Technosource, and Time Warner Cable / The Answer Group - networking, connectivity, configuration, documentation, and end-user troubleshooting.

EDUCATION

Bachelor of Science in Information Technology and Security | University of Phoenix | Cum Laude
